RECENT PROJECTS

- **Final Year Project (BS software engineering)**

  Cricket Tournament Management System (CTMS):

  Objective:

  The cricket tournament management system would provide a user-friendly platform for street cricket players to register for the tournament and confirm their spot in the tournament by paying the tournament fee using any online payment option. Another goal of this project is to eliminate the requirement for any paper work in order to register the teams.

  Integrated Payment Methods:

  Stripe (for credit card payment)

  Tools: PHP, AJAX, MySQL

- **Apexrealtors**

  Objective:

  The Apexrealtors is USA based realtor website, they provide listings of available places/homes/Apartments/Shops, in this website there are two main properties is residential and commercial

  Tools: PHP, JavaScript, JQuery AJAX, MySQL

- **Roam Buddy**

  Objective:

  The roam buddy is a system that provide e-SIM, data plan, and physical sims according to regions and countries, if you are travelling abroad you can easily purchase or active even you can buy data as well through different payment methods

  Integrated Payment Methods:

  flutter waves mpesa, flutter waves airtel, stripe, dpo etc

  Tools: Angular (v13), Typescript, Restful API

- **Reanda Haroon Zakaria (ERP)**

  Objective:

  This is the complete ERP of reanda haroon zakaria company, in this project we solve their task related issues and client management system and password management and books management as well.

  Tools: Angular (v12), Typescript, Restful API, Java(Springboot)
